About Thermofoil Doors:

Thermofoil, sometimes referred to as RTF (Rigid Thermofoil) is a form of laminate. It is a poly vinyl film applied to MDF using contact cement, heat and pressure. Thermofoil is available in a large variety of solid colours and many patterns including wood grains. The application process makes it possible for Thermofoil to resemble wood, marble or granite detailing more closely than laminate can. Thermofoil products are easy to care for and are not likely to chip.

Sunset Cruise is a warm greyish tone with a varying wood-grain. The grain pattern is reminiscent of Walnut. The finish has a medium reflective quality that hides fingerprints and long-term wear.

Sunset Cruise is available in Urban, Poly and Thermofoil at a DM3 price point
