# WOOD DOORS

# WOOD SPECIES

**Maple**

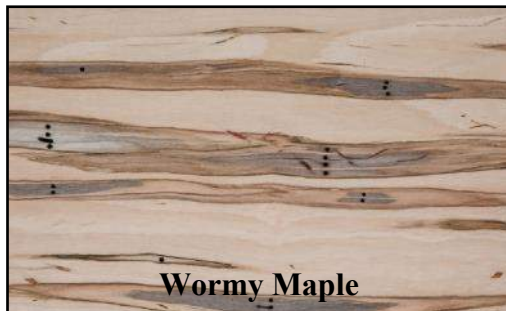

**Cherry**

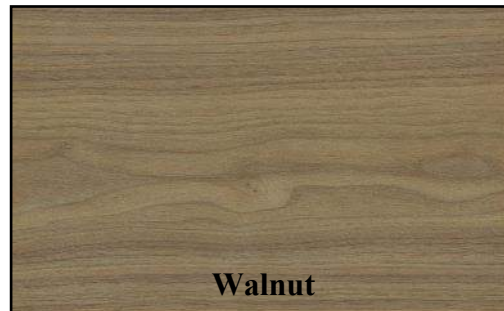

**Red Oak**

**Knotty Pine**

**Wormy Maple**

**Walnut**

**Maple** - Distinguished by its smooth, even, and fine grain, maple's light color and sleek look makes it increasingly popular.

**Red Oak** - Classic open-grain patterns and noticeable variations in oak's hearty color provide natural warmth with rich texture that coordinates beautifully with any décor.

**Wormy Maple** - This unique variation of soft maple is full of character. Color may range from sapwood to heartwood, and may include mineral streaks, discolorations, and worm holes throughout.

**Cherry** - One of the richer, more elegant woods with a fine, uniform straight grain and texture.

**Knotty Pine** - The rustic appearance of knotty pine and its imperfect characteristics make it a perfect choice for a country look.

**Walnut** - A durable hard wood with exceptional strength because of its tight, dense grain. Walnut's natural color will "mellow" with age & exposure to light.
